Norovirus/Gastrointestinal Outbreak, Yolo and Sacramento Counties

On 05/15/17, the California Department of Public Health Duty Officer (CDPH DO) and California Department of Public Health Emergency Preparedness Office Duty Officer (CDPH EPO DO) reported to the CSWC that Yolo County has experienced a recent Norovirus/Gastrointestinal Outbreak that is affecting numerous schools in the county.

- 42 schools have been affected.
- 1,820 students, teachers, and staff are ill with stomach cramps, vomiting, and/or diarrhea in schools throughout Yolo County.
- Yolo County Health and Human Services is working with California Department of Public Health (CDPH) and the California Department of Pesticide Regulation (CDPR) regarding the concerns schools have using Bleach.
- Yolo County Health and Human Services will continue to work with Yolo County Office of Education to stop the spread.

Since 05/04/14, there have been reported outbreaks in schools in Sacramento County affecting students and staff. As of 05/16/17, the CDPH Duty Officer reports that:

- 19 public and private schools have reported these outbreaks.
- 1 specimen from an affected individual tested positive for Norovirus in the Sacramento Public Health Lab.

The California State Warning Center (CSWC) and California Department of Public Health (CDPH) continue to monitor the situation and will provide updates as they are received.

SITUATION SUMMARY

2017 February Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

Per the Cal OES Coastal Duty Officer (CDO), as of 05/16/17, full closures of Nacimiento-Fergusson Road began on 05/18/17 at 0800 hours. Motorists wishing to travel eastbound towards US Highway 101 will be held at State Route 1 until the convoy passes.

Cal OES Inland Region

River Forecast - The following rivers are forecast to meet or exceed Flood stage:

Placer County:

- Truckee River at Truckee is forecast to be at flood stage at 4.7 feet the morning of 05/22/17
 - Potential Impacts: Flood Stage. Minor flooding from Bear Creek in the Alpine Meadows area to Truckee. Truckee River bike path between the River Ranch at Alpine Meadows Road to Tahoe City begins to flood.

Mariposa County:

- Merced River at Yosemite at Pohono Bridge is forecast to be at flood stage at 10.0 feet the morning of 05/23/17
 - Potential Impacts: Western portion of North Pines Campground, located at the east end of Yosemite Valley between the confluence of the Merced River and Tenaya Creek, begins to flood. Water rises to the base of the swinging bridge downstream from Chapel Meadow.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Alpine County: West Fork Carson River at Woodfords; East Fork Carson River at Markleeville
- Stanislaus County: Tuolumne River at Modesto

WEATHER SYNOPSIS BY REGION

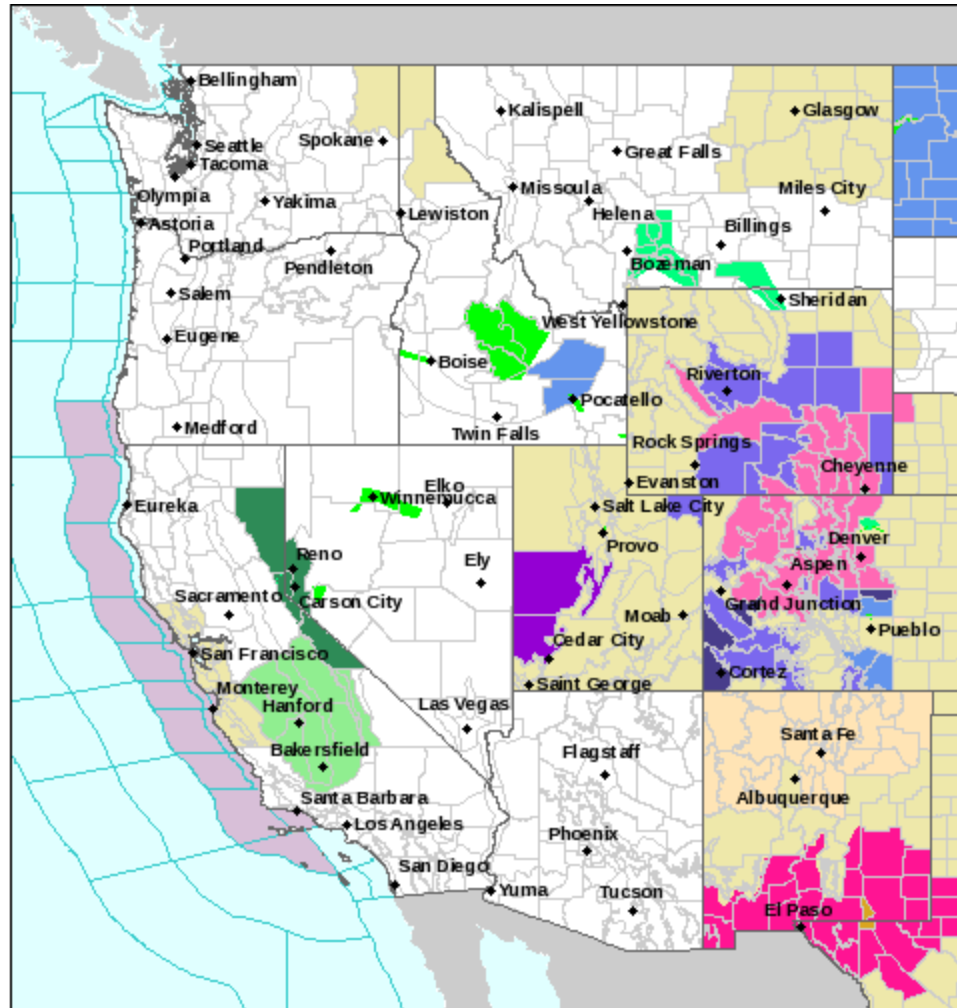

NORTHERN CALIFORNIA

High pressure over the eastern Pacific will continue to build onto the west coast through Saturday. Temperatures will rise from a few degrees above normal today to near 10-15 degrees above normal by Saturday. Northwest-Northeast winds will gust to 15-25 mph today, and locally higher in the most wind-prone areas in and around the Sacramento Valley until midday Saturday. Late on Saturday the high pressure will weaken a bit as a low pressure trough moves in from the north. Increasing instability will lead to afternoon cloud buildups over the higher terrain Saturday, with a stray shower or thunderstorm possible. The trough will remain over the area and deepen for several days, leading to a daily chance of afternoon and evening mountain showers and thunderstorms from Sunday through much of next week. By midweek isolated showers and thunderstorms are possible at lower elevations as well. Temperatures will be 15 degrees or so above normal during the early and middle of next week.

SOUTHERN CALIFORNIA

A cold low pressure area departing the area will produce strong northwesterly flow over many areas today. Strong winds of 20-30 mph with gusts to 50 mph will be possible, especially this afternoon, across the central coast and Santa Barbara County, the Kern County Mountains and most of the desert north of I-40. The strong winds will generate some upslope drizzle or light shower activity over the far southern San Joaquin Valley and the Grapevine as well as the northern Sierras. A trace to a quarter of an inch of rain can be expected in these areas. Otherwise, expect mostly sunny skies and cool temperatures once again with highs in the 50s in the mountains to the 60s and lower 70s in the valleys. The flow will turn northerly tonight, leading to infrequent wind gusts to 45 mph across the Santa Ynez Range and the I-5 Corridor. These winds will slowly decrease Thursday afternoon. High pressure over the Pacific will draw closer to the area by the weekend, leading to much warmer weather. Highs Thursday will climb 8-12 degrees over many valley areas as the marine layer retreats. By the weekend, expect valley and lower foothill regions to be in the mid 90s with desert readings topping 105°. Winds will be light over the weekend. Expect minimum relative humidity to drop toward the 10-15% range each afternoon below 3,000 feet. A return of onshore flow will bring slightly cooler weather back to the coast early next week, but most inland areas will remain seasonally warm. No additional rainfall is expected during the extended period.
